DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 9 is rejected under 35 U.S.C. 102(e) as being anticipated by Rijavec.

Re claim 9, Rijavec discloses (column 3, lines 36-59; column 5, lines 16-67) a printer calibration system in which a first calibration function is provided by a host device 102 and a second calibration function is generated at predetermined times ("periodic calibration to update the calibration curves; column 5, lines 21-22). The first and second calibration functions are stored (the memory referenced at column 3, lines 55-59 and the "printer 112 may include one or more arbitrary transfer functions" calibration functions referenced at column 6, lines 3-5, respectively).

Allowable Subject Matter

3. Claims 1-8 & 10-19 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 1-2, 7, 10-11, & 17-19 (and dependent claims 3-6, 8, & 12-16), the art of record does not teach or suggest the recited arrangement or comparing the values of a calibration function downloaded from a host device and a calibration function generated at a predetermined timing and performing a selective notification or calibration operation based on the result of the comparison.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Walowit and Sasanuma et al. disclose further examples of printer systems using multiple calibration functions.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. Brinich at 703-305-4390. The examiner can normally be reached on weekdays 7:00-4:30, alternate Fridays off.
